Mohammed N. Shariff

nadeem.wii@gmail.com | 714-213-2408 | Los Angeles, CA

Education

California State University, Northridge - B.S. Computer Science *May 2021 - Present*

Relevant Coursework: Software Engineering, Operating Systems, Network Security, Algorithm Design, Advanced Data Structures, Object Oriented Programming, Embedded Systems, Assembly Language, Trustworthy AI
GPA: 3.0+

Technical Skills

Languages:	C++, C#, Java, Python, Swift, JavaScript, Lua
Platforms & Systems:	Windows, Linux, Android (Rooting), iOS (Jailbreaking), LAN Configuration
Hardware & Firmware:	Custom PCB Design, Flashing Firmware, Reverse Engineering, Imaging, RAID Systems
Tools:	GitHub, Oracle, Autodesk Fusion, PSpice, Diptrace, Teams, Slack

Professional Experience

Syncore - Frontend Developer & UX Designer *May 2025 - July 2025*

- Designed and implemented front-end components using React.js while managing legacy functionality.
- Assisted in backend improvements including database integration and scheduling tools.
- Managed GitHub workflows including branching, pull requests, and production deployment.

SAIL (Society for AI Literacy) - IT Intern *May 2025 - July 2025*

- Collaborated on AI-powered tools and web-based systems in a remote team environment.
- Gained hands-on experience in troubleshooting and assisting with system deployments.
- Engaged in technical knowledge sharing and contributed to codebase.

Technical Projects

Firmware Modification & System Security Research

- Console Modification: Executed custom firmware (CFW) installations on Nintendo DS, PSP, PS4, and Nintendo Switch, involving low-level system exploits and homebrew environment setup.
- Mobile OS Research: Performed kernel-level modifications through jailbreaking (iOS) on iPod Touch 5 and iPad Air 2, and rooting (Android) on a Galaxy Note 9 to bypass manufacturer restrictions.
- Secure Cloud Server: Built and configured a dedicated LAN-accessible storage system with encryption and RAID backup.

Custom Mechanical Keyboard Design

- Designed a capacitive PCB from scratch using Diptrace and 3D-printed a custom housing via Autodesk Fusion.
- Integrated hardware and software by flashing custom firmware to a microcontroller.

Professional Strengths

- Troubleshooting: Confident in resolving complex hardware and software issues across Windows and Linux.
- Documentation: Efficient in documenting systems and maintaining inventory.
- Communication: Strong history of working in team environments to resolve technical issues.
